

# What will be the summer of Brussel under future climate conditions?

CORDEX.be Stakeholders meeting

Duchêne François, Gwenn Cugnon

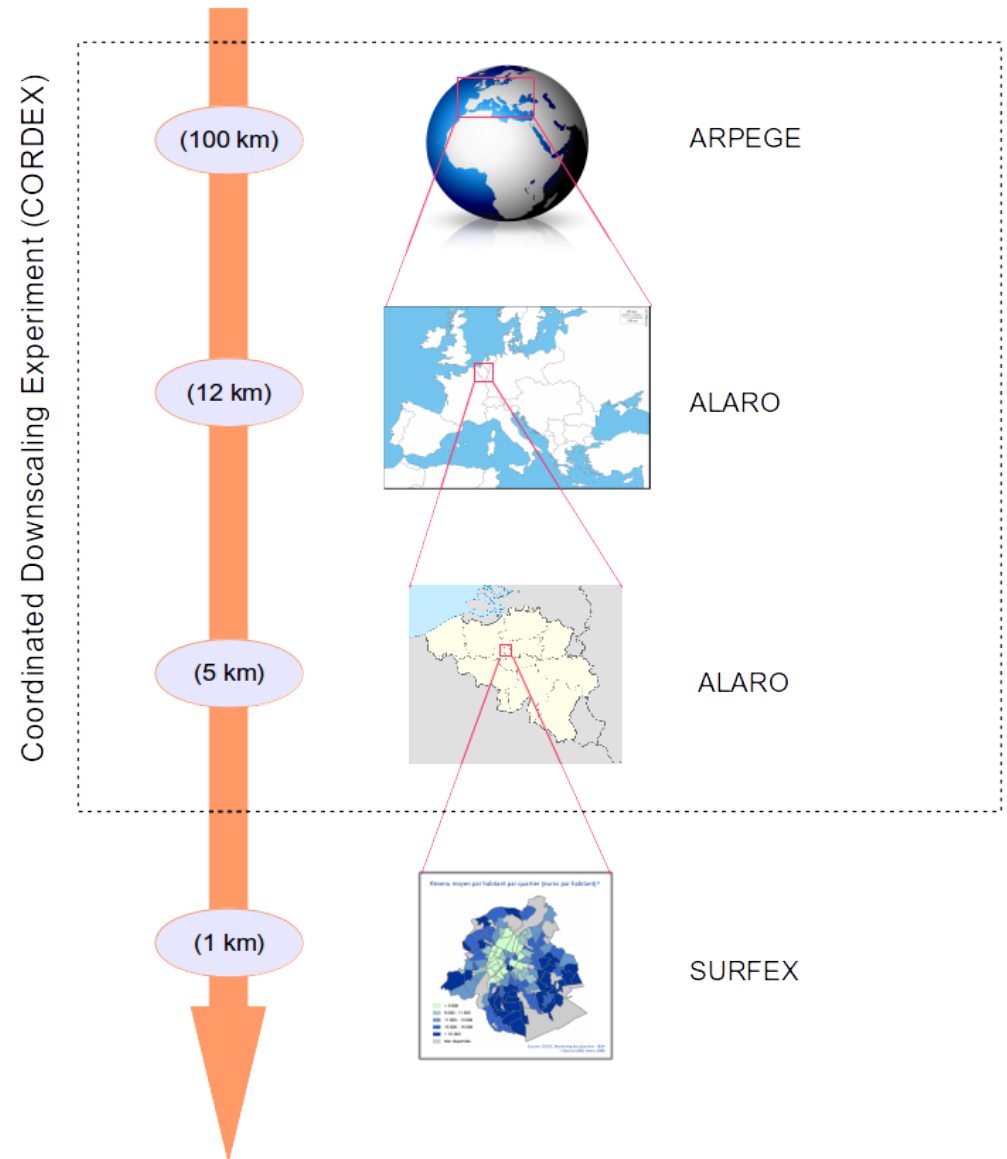

25 september 2017

# Tools

- Dynamical Downcalling

## SURFEX : Land Surface model

# Cities more vulnerable

Population by 2050 (UN-Habitat, 2010)

# Temperature in Brussel Center

Average T per year

# Heatwaves ?

# How many?

# How many?

# How many?

(c) RCP85

# How strong?

■ HIST  
■ Near Future  
■ Far Future

(a) RCP85 Urban : Number HW / year

■ HIST  
■ Near Future  
■ Far Future

Frequency

(b) RCP85 Rural : Number HW / year

■ HIST  
■ Near Future  
■ Far Future

(c) RCP85 Urban : Average Intensity [ $^{\circ}\text{C}$ ] / HW

■ HIST  
■ Near Future  
■ Far Future

Intensity

(d) RCP85 Rural : Average Intensity [ $^{\circ}\text{C}$ ] / HW

■ HIST  
■ Near Future  
■ Far Future

(e) RCP85 Urban : Average Duration [days] / HW

■ HIST  
■ Near Future  
■ Far Future

Duration

(f) RCP85 Rural : Average Duration [days] / HW

What about **human comfort**?

# Heat stress

■ T\_min  
■ T\_max

■ T\_min  
■ T\_max

**Twice as large !**

$$\sum_i [(T_{min,i} - 18^{\circ}\text{C}) + (T_{max,i} - 30^{\circ}\text{C})] h_i$$

# HUMIDEX

(a) Rural : Number [h] / Number [days]

RCP85 Far Future (2075-2099)

(b) Urban : Number [h] / Number [days]

RCP85 Far Future (2075-2099)

$$HUMIDEX = T + \frac{5}{9(e - 10)}$$
$$e = RH \times 6.11 e^{(17.67 * T / (243.5 + T))}$$

## Mitigation :

- change albedo : new materials, white painting,...
- green area : more trees, parks,...

# Albedo

Average summer UHI reduced

Source albedo : Global Cool Cities Alliance, A practical guide to cool roofs and cool pavements, 2012, pages 24-29, 30

# Effect

# And for green area

Average summer UHI reduced

# Effect

# Discussion

- Limits :
  - ◆ Results depends on the scenario (rcp85 /= cop21)
  - ◆ No city expansion
- Future work :
  - ◆ URCLIM project :
    - ➔ Same downscaling methodology & urban footprint
    - ➔ Several case studies : Toulouse, Gent, Helsinki,...
    - ➔ UHI, precipitations extremes, snow & ice for road, air quality, economic impacts

# Thank you!

"I know nothing about the subject,  
but I'm happy to give you my expert opinion."

[francois.duchene@meteo.be](mailto:francois.duchene@meteo.be)

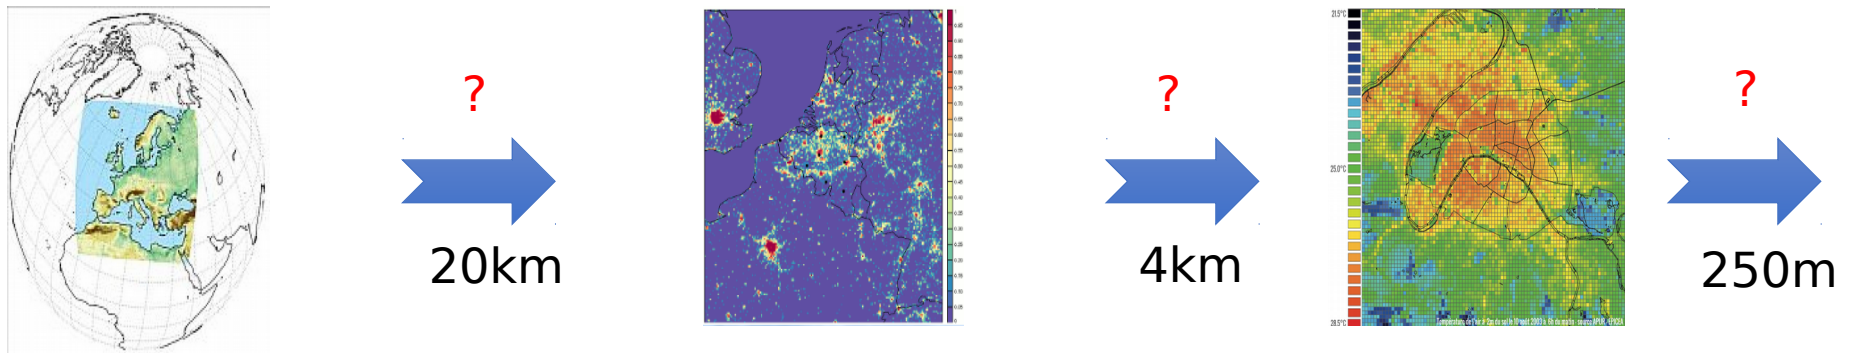

# Annexes

# URCLIM

*Urban CLIMate services*

## 2) Downscaling methods from regional climate models to urban scales & uncertainties

- Urban Heat Island
- Precipitations extremes
- Snow and ice for road
- Air Quality
- Economic impacts

# WP4: Case studies

Toulouse

Gent & Brussels

The Randstad

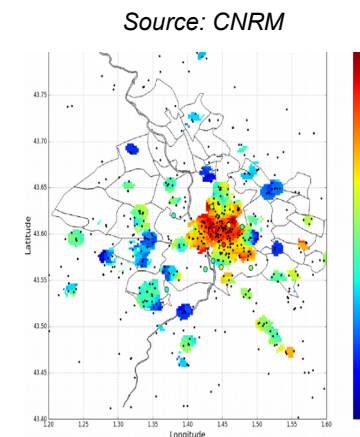

Helsinki

Bucarest

## 5 case studies:

- Involvement of urban users
- Case study selection
- Repository
- Collection of high resolution datasets
- Data fusion

Example of data:

<https://weathermap.net/atmo.com/>

	routes	murs	toits
<b>Initial</b>	0,08	0,25	0,15
<b>Albedo min</b>	0,20	0,40	0,25
<b>Albedo moy</b>	0,50	0,62	0,55
<b>Albedo max</b>	0,80	0,85	0,85

	Proportion de végétation en milieu urbain dense
<b>Etat initial</b>	10%
<b>FractVeg 0.3</b>	30%
<b>FractVeg 0.5</b>	50%
